

# Situation at the moment in January 2014

## Describe your usual indoor breaktimes

Pupils like to hang around in our library listen to music and play different kind of board and other games. Also they have possibility to read magazines, comics and books and use few computers to play.

Now we have some new funitures and cosy areas around the school where they to spend break time just to chat and enjoy the company of their friends. There is a special class to play table tennis and table ice-hockey and from the beginning of January also a class to weave on a loom.

Pupils also can book our music class in advance for their band rehearsal.

Some pupils read and do homework and prepare for the tests.

**Describe the typical outdoor breaks**

Lunch break is 5 minutes longer and they have a chance to borrow brand new out-door equipments, (tool kits) as new footballs, net ball equipments, frisbies and nets for them for example.

Pupils who wanted have tool kit card as library card they have to show when they borrow something. They had to sign the special agreement to accept the rules of borrowing things. Also their parents had to sign the form. Pupils take care themselves the whole borrowing system at school and the all pupil are very enthusiastic about this new system.

**Tool kit room**

**Our library / to spend time area**

Tool kit card

We have realized that our pupils are much more active during the breaks at the moment and not as much teacher involvement is needed.

Next steps....

We are planning to buy some new in-door games with that money you promised us to use, 1000e, as dancing mat, kinetic game and so on...

We had school yard renovation meeting with the person who is charged of that and so we'll have brand new school yard as we start the school next Autumn 7<sup>th</sup> August.

We'll have international workshop day 14<sup>th</sup> February for the whole school, 385 pupils all together and about 40 staff members. The main purpose is offer to our pupils "fun" day to get to know our NordPlus and Comenius projects and the countries involved.

In February we'll have meeting with the person who is involved "In the School in the move" – project. He help us to organize lectures for you in April and also help us with the new application for school activities equipments.
